

FACTS FOR SICK WOMEN

LYDIA E. PINKHAM

No other medicine has been so successful in relieving the suffering of women or received so many genuine testimonials as has Lydia E. Pinkham's Vegetable Compound. In every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound. Almost every one you meet has either been benefited by it, or has friends who have. In the Pinkham Laboratory at Lynn, Mass., any woman any day may see the files containing over one million one hundred thousand letters from women seeking health, and here are the letters in which they openly state over their own signatures that they were cured by Lydia E. Pinkham's Vegetable Compound. Lydia E. Pinkham's Vegetable Compound has saved many women from surgical operations. Lydia E. Pinkham's Vegetable Compound is made from roots and herbs, without drugs, and is wholesome and harmless. The reason why Lydia E. Pinkham's Vegetable Compound is so successful is because it contains ingredients which act directly upon the feminine organism, restoring it to a healthy normal condition. Women who are suffering from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

HELD IN THE CASE OF THE SOMERVILLE GIRL.

Two Young Men Charged With the Abduction of Florence Perkins.

New York, Jan. 31.—Two young men, describing themselves as Hoskell Katzen and Ernest Newton, each of whom is 21 years old, were arraigned in the Jefferson market court yesterday on an affidavit charging them with the abduction of 16-year-old Florence Perkins from her home at 26 Delaware street, Somerville, Mass. They were held in \$2,000 bail each.

Magistrate Cornell turned the girl over to her brother and aunt, who came to this city in search of her. The latter were in court yesterday.

Harry E. Perkins, the girl's father, reported to the Somerville police that the girl ran away from home last Saturday. Her presence in New York was learned through a letter written by her to a friend in Somerville.

YARMOUTH DIVORCE CASE SET FOR NEXT WEEK.

The Court Announces That Hearing Will Begin on Wednesday.

London, Jan. 31.—Sir Birrell Barnes, president of the divorce court, yesterday fixed the hearing of the suit brought by the countess of Yarmouth, who was Miss Alice Thaw of Pittsburgh, against her husband, for the annulment of her marriage, for next Wednesday afternoon. The attorney for the countess of Yarmouth in making the application said the case would be short.

GEN. JACKSON LETTER FOUND

Described Fighting in New Orleans in 1814

ON EYE OF GREAT BATTLE

Fred S. Platt, Clerk of the Federal Court, Makes a Discovery While Moving Office from Burlington to Rutland.

Rutland, Feb. 1.—An original autograph letter by Gen. Andrew Jackson, written Dec. 26, 1814, describing the fighting preliminary to the battle of New Orleans, in which he defended an army of Wellington's veterans who had routed Napoleon's marshals, has been found here.

Fred S. Platt, clerk of the federal courts in Vermont in moving the furniture of his office from Burlington to this city this week, discovered the letter among the files. It was addressed to Willie Blount, governor of Tennessee. The letter is the property of Col. Bradley B. Smalley, former clerk of the court and was given to him by John G. Saxe, having come to the post's hands from a relative in Tennessee.

The letter reads as follows:

4 Miles Below New Orleans, Dec. 26, 1814.

Headquarters 7 M Division.

Dear Sir—Your letter is to hand, and for your kind expressions of me receive my thanks. I have time to say so much. The gun boats were taken—the (lives) in complete possession of the enemy—a good look out on every point all well guarded. Early morning on the 23rd came up two a Bayo—that had been three ordered to be stopped, and which was well guarded as I thought by the militia and the first account I had of them at 12 o'clock, was that they were in great force within three leagues of Orleans marching for the city. Coffee had reached the country of Orleans two days before and were encamped 4 miles above—I ordered a movement of the troops, left Gen. Coffee to guard the city, and to protect any left at home and with part of 4th infantry two forces of artillery in Orleans volunteers, and a few of the battalion of color and eight hundred of Gen. Coffee's brigade about 1700 in all, attacked them at 8 o'clock p. m., and drove them at all points—the darkness of the night from fog prevented me from entirely dispatching them—Commodore Patterson who fell down in the Carolinas was of great service to me, my officers and men behaved well, and Gen. Coffee and his corp have added fresh laurels to their brows. The enemy was soon passed, we are in view of each other, each preparing to try our strength anew—The Kentucky troops not arrived.

With best wishes,

Andrew Jackson,

Major Gen'l, Comdg.

P. S. We took sixty odd prisoners among the number Major Mitchell was at the burning of Washington, we have had some prisoners—a few the fellows—but none compared with the enemy—the contest ended better than we expected.

Address to

His Excellency

William Blount,

Governor of Tennessee.

EDWARD CROMWELL, HERO OF THE DRAFT RIOTS, DEAD.

Once Prominent New Yorker Passes On at Age of Eighty-seven.

Denver, Col., Feb. 1.—Edward Cromwell, aged eighty-seven years, died Thursday night at the home of his daughter, Mrs. G. C. Sampson of this city. His long life was largely devoted to philanthropic and patriotic work.

He was born in New York City, was a charter member of the Produce Exchange, and served as its secretary and treasurer for ten years. He was an active member of the famous New York volunteer fire department, and as a member of the United States Indian commission he was instrumental in saving Indian territory and Oklahoma to the union.

During the draft riots of 1863, Mr. Cromwell organized and enrolled many members of the Produce Exchange. These men drilled daily and fought in the streets of New York to protect the negroes. Mr. Cromwell also helped to organize and send the first regiment sent from New York.

SUFFRAGETTES ARE SENT TO PRISON.

Go Rather Than Pay Fine—Four Found Guilty of Disturbing Peace in London.

London, Feb. 1.—The suffragettes, dissatisfied with the reply made by Herbert Asquith, chancellor of the exchequer to a deputation which saw him by appointment at his office, resolved to send another deputation yesterday to his private residence.

When the deputation presented itself it was refused admittance and resorted to the usual tactics of plying the door-knocker, ringing the bell and making speeches.

The women declined to disperse at the command of the police, and four of the ring-leaders were arrested.

Later they were sentenced to pay a fine of 10s. or suffer a month's imprisonment. They accepted the imprisonment.

BROKE HIS LEG.

Chicago Man's Boast of Strength Proved Disastrous.

Chicago, Feb. 1.—George Domonoff broke his leg Thursday evening while endeavoring to show his friends that he was the strongest man among them. He had received \$10 that no one could throw him on his back in a wrestling match. He was taken up, and in the middle which followed Domonoff slipped and falling heavily on his right leg broke it.

MAGAZINE REVIEW.

Triumphant Career for a Woman.

The growth of mental healing and the apothecia of Mrs. Eddy are the subjects of the February installment of the history of the Christian Science movement. Miss Milline says:

"The first five years of Mrs. Eddy's life in Boston had been years of almost uninterrupted progress. Her college had, by 1837, grown to be a source of very considerable income. Her classes now numbered from thirty to fifty students each, and a class was instructed and graduated within three weeks' time. The course which was formerly the only one taught at Mrs. Eddy's college was now called the 'primary course,' and she added what she termed a 'normal course' (being a review of the primary), a course in 'metaphysical obstructions,' and a course in 'theology,' in all of which she was the sole instructor, tuition fees amounting to eight hundred dollars."

"Since she first began to teach her 'science,' the story of her public life is simply the story of how she kept her hold on it. The very way in which she had come by her discovery made her always afraid of losing it, and she was forever detecting some student in the act of making off with it. Even in Lynn, she slept, as it were, with her hand on the cradle."

"Mrs. Eddy's controversy with Mr. Dresser set her less infatuated students to thinking. Many of them decided to investigate this Quimby claim, and bought the works of the Rev. Warren F. Evans, who had practiced in New Hampshire and in Massachusetts, and who had published two books upon mental healing before the first edition of 'Science and Health' appeared."

"After reading Dr. Evans, a number of Mrs. Eddy's students were quickly dropped out of her Christian Science association forming the nucleus of what was later to become the 'New Thought' movement."

"Mrs. Eddy, seeing the danger of liberal investigation, quickly proceeded to 'sterilize' the sources of mental science literature." How she managed it is a story worth reading.

\$1,600 for a Bird's Egg.

Most of the masculine Americans at some time or other in their careers have "hunted birds' eggs," but few of all those who have tramped hill and dale, climbed towering trees and peered into hedgerows in search of the fragile shells, realize that in far corners of the world, there are men who are spending their lives in the pursuit of these very objects or others more rare. So writes Harry H. Dunn in the Technical World Magazine for February.

The tangled jungles of equatorial Africa know these men; the snowy steppes of northern Asia have felt the pressure of their tireless feet; they trace new trails across the Sahara, at the globe and on the spreading Pampas of the New World's southern continent, while the distant islands of the sea are secured for new specimens in bird skins and birds' eggs.

Swinging on slender threads of rope from dizzy cliffs that lean above the lashing waters of the rough North Atlantic, they gather the solitary eggs of the California gull, the largest bird that flies, and in the jungles of the tropics they risk their lives amid fevers and poisonous reptiles and vindictive natives in search of rare hummingbirds; and other gorgeous feathered dwellers in the warmer lands.

The writer tells some very interesting stories of birds' eggs and eggs hunters, including one of the \$1,600 egg, which is the heart's desire of collectors. Excellent photographs illustrate the article.

LAWSON ABANDONS THE FIGHT.

Author of "Frenzied Finance" Denies the People "They Guessed and Grinned."

At the beginning of my battle the people stood on the curb, looking on at the most terrific onslaught ever made on man, and—grinned. Thousands of pros traders, describing me as all that was dangerous and detestable, the people read without resentment and—grinned. Scores of thousands of persons, looking up to ridicule, the people bought and encouraged as they grinned. Not a day went by without my family being deluged with anonymous vilification meant to terrify and pain. Not a month went by but I received mysterious little clock-works, powder and poison packages, threats, assaults, and worse. The public platform from me and of the country to the other rang with the curses of the system's character thugs until my life, had I chosen to permit it, would have been a hell on earth. And the people listened and—grinned.

What did I do? Complaint? Shirk my self-imposed task? Exchange my bolshoi position for one of ease and do-lars—for at no time since the battle began but I could have gained millions by deserting my task. What did the people do? They shouted, "Lay on, Lawson; don't quit, but for heaven's sake and ours, do hurry up!" and grined. Then came the almost impossible victories, the insurance exposures, the terrific financial revelations, the thousands of appeals from the policyholders to the system's my light, single-handed, but at an expense to me of over \$1,000,000, to do so. What did the people do, then? They spent their time gossipping which of the system's profits was the most millions through my insurance exposure was true, and as they gossiped, they grined. Thomas W. Lawson, in the February Everybody's.

A Skin of Beauty is a Joy Forever

Dr. F. Felix Gouraud's Oriental Cream or Magical Beautifier.

Removes the Pimples, Redness, Itch, Head, and Skin Disorders, and cures all the troubles of the face and skin.

It is the best of all the skin preparations, and is the only one that is not only safe, but also effective.

It is the only one that is not only safe, but also effective.

It is the only one that is not only safe, but also effective.

TRUST FIGHT NOT WON

Smith Speaks to the New York Manufacturers

DEFENDS ADMINISTRATION

The Conflict, He Says, Will Last for a Generation—Roosevelt Is Trying to Promote Business Efficiency.

New York, Feb. 1.—Defending the administration's attitude toward the corporations and warning his hearers that they must be prepared to witness a fight of a generation before the wrongs that have grown up in corporation management would be righted, Herbert Knox Smith, commissioner of corporations, addressing the members of the Manufacturers' association of New York and their guests to the number of 350 at their banquet at the Union League club in Brooklyn Thursday night, declared that Roosevelt is the best friend of business success the country has. "His administration," said Mr. Smith, "is trying to save and promote business efficiency, to maintain a universal machinery which shall be capable of standing up to the work of an industrial nation. He wants to see that man win who is a good manufacturer, a good railway man, a good salesman, who gets good business because he gives good service, and that man in who is only good at getting an unfair advantage or at preventing anyone else from doing business. We want to see men like yourselves win, who make and sell a real article for an honest price, not the man who is merely selling lithographed liabilities. The one means national success, the other international disaster."

The plan of prosecuting corporations and individuals who commit corporate wrongs are committed, was warmly defended by the commissioner. "Industrial crimes by which a corporation benefits are rightly chargeable to that corporation," he asserted. "Prosecute individuals for a crime and the best you can do will usually be the halting of some unhappy thousand dollars. If the corporation is punished crimes will stop. If the clerk is convicted the corporation doesn't care."

Other speakers at the banquet were Leroy D. Thomas of Chicago, on "Dangerous Optimism"; James M. Van Cleave, president of the National Association of Manufacturers; on "Problems of the Manufacturers for 1908"; H. F. McFarland, on "The National Capital: The National Spirit"; and Professor A. M. Kirkwood of Columbia university, on "The University and the Business Man."

President Van Cleave in his address expressed himself as not alarmed at the possible effect of the approaching presidential campaign upon business.

Little Change in Trade Conditions.

New York, Feb. 1.—Dispatches to R. G. Dunn and company indicate but little change in the general trade situation, although financial conditions are easy, with rates about normal. Wholesale markets at Boston are still unsettled, extreme caution prevailing, although the belief is becoming general that prices of cotton goods will not decline further. Manufacturers of textiles and jewelry at Providence operate only part time, and conditions are unsatisfactory, with collections slow.

COMMON SENSE MUST SOLVE INDIAN PROBLEM.

John Morley Replies to Criticism in the House of Commons.

London, Feb. 1.—John Morley, secretary of state for India, replied in the House of Commons yesterday to criticisms of the Indian government. He said the great mass of perplexing problems in India must be regarded on a common sense plan, and that it was not common sense to talk of "imperial dominions."

But the government was ready when occasion offered to consider the inclusion of India on the viceroy's council.

A Woman's Back

Has many aches and pains caused by weakness and falling, or other displacement of the pelvic organs. Other symptoms of female weakness are frequent headache, dizziness, imaginary specks or dark spots floating before the eyes, gnawing sensation in stomach, or bearing down in lower abdominal pelvis, region, disagreeable drains from pelvic organs, faint spells with general weakness.

If any considerable number of the above symptoms are present there is no remedy that will give quicker relief or a more permanent cure than Dr. Pierce's Favorite Prescription. It has a record of over forty years of cures
